OPERATING TEMPERATURE RANGE

Continuous duty from 0°C to 71°C with appropriate deratings from 40°C to 71°C.

STORAGE TEMPERATURE RANGE

-55°C to +85°C.

OVERLOAD PROTECTION

THERMAL

Thermostat protects unit from excessive ambient temperature as well as inadequate air velocity. AC power must be momentarily removed from unit after thermal shutdown in order to restore operation.

ELECTRICAL

External overload protection — adjustable, automatic electronic current-limiting circuit limits output current to preset value. Current-limiting setability to 105% of rated current via front panel adjust.

OVERVOLTAGE PROTECTION

Built-in, adjustable overvoltage protection is standard on all sets. When preset voltage is exceeded, the overvoltage protector crowbars the output and removes the inverter drive. AC power must be momentarily removed from unit after overvoltage shutdown in order to restore operation.

OVERVOLTAGE PROTECTION ADJUSTABLE RANGES

Digital panel meter standard on LT-800, 820 Series. Monitors output voltage/current by means of a volt/amp selector switch on LT-800 Series. Separate digital panel meters on LT-820 Series allow simultaneous monitoring of output voltage and current. Separate analog meters on LT-860, LT-860-GPIB, LT-880 and LT-880-GPIB Series provide for simultaneous monitoring of output voltage and current. Additional LED on front panel of LT-860-GPIB, LT-880-GPIB and LT-890-GPIB indicates auto/manual operation.

LED STATUS INDICATORS

An overvoltage/overtemperature indicator lamp will light to notify the user of the occurrence of either an overvoltage or overtemperature shutdown condition. AC power must be removed from the unit to reset the power supply and the light. A line fault indicator with automatic reset indicates power loss or loss of a phase on LT-860 and LT-860-GPIB Series.

REMOTE SENSING

Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

REMOTE ON/OFF

Isolated terminals on LT-860 and LT-860-GPIB Series allow for these remote functions: Turn-on—Logic zero, short circuit or open circuit; Turn-off—provide 5mA into ± R terminals. Terminals on LT-880, LT-880-GPIB, LT-890, LT-890-GPIB Series allow for those remote functions. TTL compatible high will shut down the set. TTL low, short or open will turn on the set.
