

Part II – DC-to-DC Converters

LAMBDA'S MLW SERIES

High Density, High Reliability Converters for MIL-Environments

Lambda's MLW Series isolated DC-to-DC converters and filters provide an ideal solution for the unique requirements of military and civilian aerospace applications. Acceleration, shock, vibration and rapid temperature variation are common attributes of airborne equipment. The "ES" option screens units specifically for these rigorous conditions. All models feature inputs centered around 28VDC in compliance with MIL-STD-704D requirements. By using thick film hybrid technology, Lambda has achieved high density, high reliability and superior regulation without requiring external components. The MLW Series is available with single and dual outputs up to 70W, and triple outputs up to 60W.

MLW SERIES FEATURES

Available With Environmental Screening

For the most rugged applications, optional screening to MIL-STD-883 is available. Test methods are:

- Pre Cap Internal Visual Inspection: Per method 2017
- Stabilization Bake: 24 Hours @ 125°C per method 1008 Condition B
- Temperature Cycle: 10 times, -55°C to 125°C per method 1010
- Constant Acceleration: 500g per method 2001
- Gross Leak: Per method 1014
- Fine Leak: Per method 1014, Condition A
- Burn-in: 96 hours @ 70°C ambient
- Final Electrical Test (25°C)
- Final Visual Inspection: Per method 2009

Wide Voltage Input Range

All input voltage ranges are centered around 28VDC. Minimum input voltage varies from 16VDC to 19VDC (depending on model). Maximum input voltage is 40VDC.

Operating Temperature Range

Most MLW Series models operate from -55°C to +135°C ensuring operation in even the most extreme environment. Baseplate temperatures can fluctuate between -55°C and +85°C.

Convection Cooled

All models are convection cooled when used with the appropriate heatsink.

Synchronous Operation

The MLW1000 allows for synchronization with system clock.

High Efficiency

78% minimum efficiency on most models.

EMI Protection

MLWF filters are designed to EMI limits per MIL-STD-461B CEO3. Input voltage transient protection is also provided to MIL-STD-704B-D. In addition, the filters protect the MLW Series converters from reverse voltage.

Part II – DC-to-DC Converters

MLW SERIES SPECIFICATIONS

DC Input

28VDC Nominal.

Input Voltage Range

MLWT-952, 955: 16VDC to 36VDC. MLWS-705: 16VDC to 40VDC.
 MLWS-605, 612, 805, 812, 815, MLWD-812, 815: 17VDC to 40VDC.
 MLWS-912, 915, MLWD-912, 915: 18VDC to 40VDC. MLWS-615, 905, 1003,
 1005, 1012, 1015, MLWD-615, 1012, 1015, MLWT-1022, 1055: 19VDC
 to 40VDC.

Efficiency

74% minimum on MLWS-605, 1003. 76% minimum on MLWS-615;
 MLWD-615, 812, 815; MLWT-952, 955. 78% minimum on all other models.

EMI

All models will meet MIL-STD-461B, CE03 with an appropriate Lambda
 MLWF filter.

DC Output

Output voltage range shown in tables.

Regulated Voltage

regulation, line	(low line to high line)
	0.10% on MLWS-605, 815 MLWD-815, 915.
	0.12% on MLWS-812 MLWD-812, 912.
	0.14% on MLWS-1015.
	0.17% on MLWS-1012 MLWD-1015.
	0.20% on MLWS-705, 805, 915 and 5V output of MLWT-952, 955.
	0.21% on MLWD-1012.
	0.25% on MLWS-912.
	0.33% on MLWS-615 MLWD-615.
	0.40% on MLWS-905, 1005; ± 12V outputs of MLWT-952; ± 15V outputs of MLWT-955; +5V output of MLWT-1022, 1055.
	0.42% on MLWS-612 MLWD-615.
	1.40% on ± 15V output of MLWT-1055.
	1.70% on ± 12V outputs of MLWT-1022. (50mA preload required on 5V output of all triple output models.)
regulation, load	0.10% on MLWS-605, 815 MLWD-815.
	0.13% on MLWS-812, 915 MLWD-812, 912.
	0.17% on MLWS-912, 1015.
	0.21% on MLWS-1012.
	0.33% on MLWS-615 MLWD-615
	0.34% on MLWD-915, 1015.
	0.40% on MLWS-705, 805, 905, 1005; MLWT-952, 955; 5V output of MLWT-1022, 1055.
	0.42% on MLWS-612 MLWD-612, 912, 1012.
	0.60% on MLWS-1003.
	3.00% on ± 15V outputs of MLWT-1055.
	5.00% on ± 12V outputs of MLWT-1022. (2MHz bandwidth, 25°C, 28VDC Input Voltage.)
ripple and noise	30mV pk-pk on MLWS-1003; ± 12V outputs of MLWT-952; ± 15V outputs of MLWT-955.
	50mV pk-pk on MLWS-905, 1005, 1012, 1015; MLWD-1012, 1015.
	60mV pk-pk on MLWS-605, 612, 705, 805, 815; MLWD-612, 615.
	65mV pk-pk on MLWS-912, 915.
	80mV pk-pk on MLWS-805; 5V output of MLWT-952, 955.
	85mV pk-pk on MLWT-1022, 1055.

Input Ripple Current

Measured over a 2MHz bandwidth, with 28VDC input at full load.
 Maximum 50mA pk-pk reflected input current, on all models.

Input Voltage Transients

50VDC transient for a maximum duration of 50ms on all models. All models
 will meet the voltage transient specifications for MIL-STD-704(A-D) and
 MIL-STD-1275 with appropriate MLWF filter.

Short Circuit Protection

Indefinite short circuit protection on all outputs.

Input Reverse Voltage Protection

All models will meet with an appropriate MLWF filter.

Output Voltage Adjust

All models have a fixed output voltage, ± 1% of nominal value, at an input
 voltage of 28VDC, full load and 25°C ambient temperature. On MLWS-705
 and 805 models, the output voltage can be increased by up to 5% by adding
 an external resistor, per the chart below, between pins 3 and 4.

Nominal Output Voltage Increase	Ohms (Ω)
+ 0%	Infinity
+ 1%	390k
+ 2%	145k
+ 3%	63k
+ 4%	22k
+ 5%	0k

Cooling

All models are conduction cooled and require a suitable heatsink.
 Consult factory for heatsink information.

Operating Temperature Range

–55°C to + 85°C (baseplate temperature). Operation to 110°C for
 MLWS-605. Operation to + 130°C for MLWS-605. Operation to + 135°C
 for all other models. Consult derating curves for maximum output power
 available.

Storage Temperature Range

–55°C to + 125°C (135°C for MLW-600 Series).

Remote On/Off

Active low.

Mounting

PCB mount. Flanges available on most models for additional structural
 support and thermal transfer.

Physical Data

MLWT-952F, 955F	1.9	2.9	1.35 × 2.70 × .500
MLWD-912, 915	1.9	2.9	1.35 × 2.70 × .500
MLWS-905, 912, 915	1.9	2.9	1.35 × 2.70 × .500
MLWD-1012, 1015	4.9	5.9	2.45 × 3.20 × .595
MLWT-1022, 1055	4.9	5.9	2.45 × 3.20 × .595
MLWS-1003, 1005, 1012, 1015	4.9	5.9	2.45 × 3.20 × .595

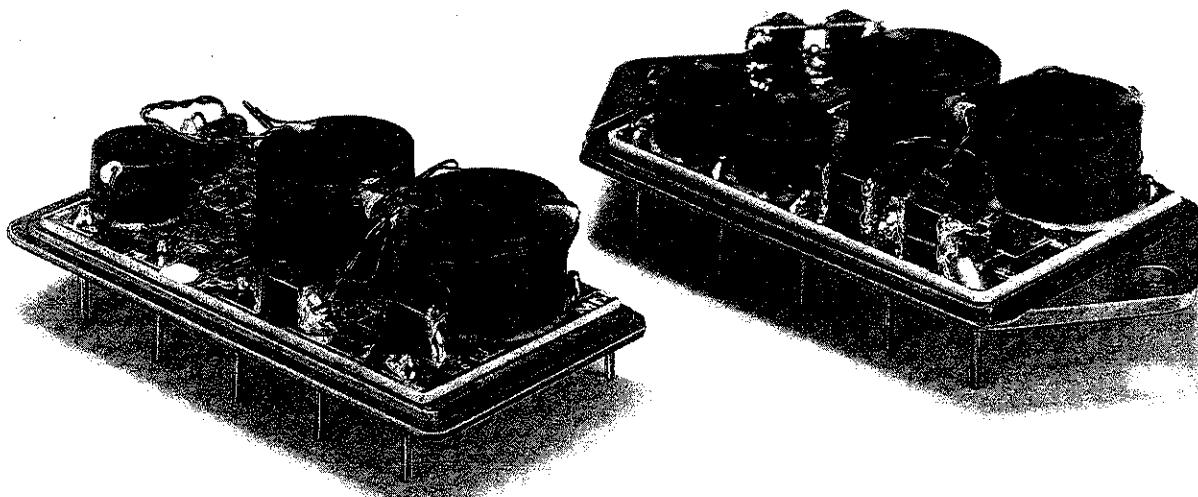

Options

All MLW Series power supplies and MLWF Series filters are available with
 screening per MIL-STD-883. Consult factory for applicable MIL-STD-883
 tests. To order optional screening, add the suffix "ES" to model number and
 25% to unit price.

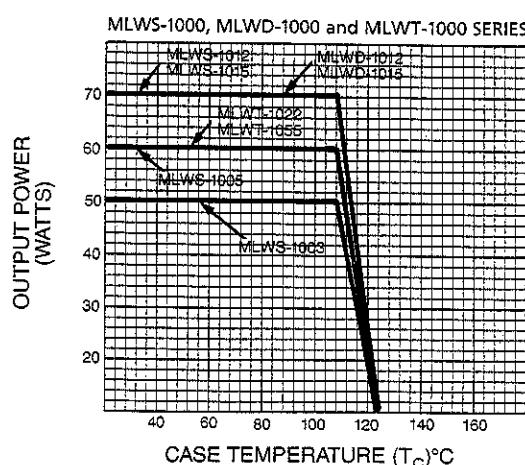

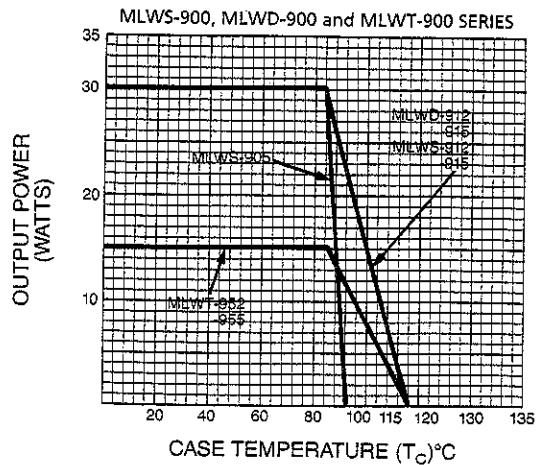

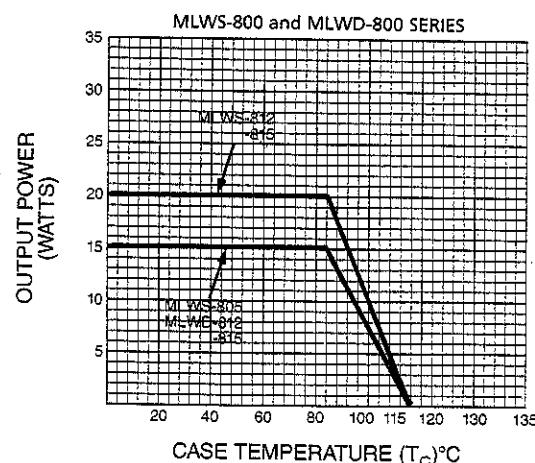

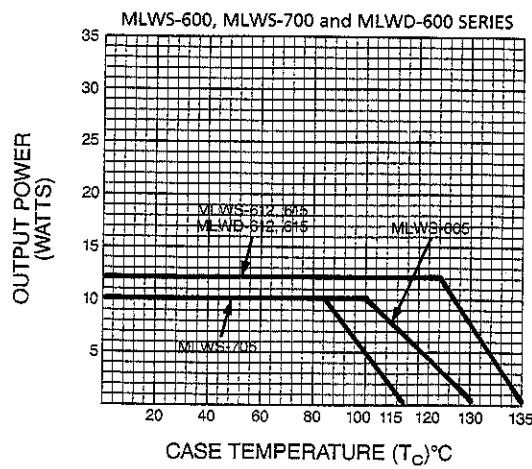

Guarantee

One year guarantee includes labor as well as parts on all MLW Series
 power supplies and MLWF Series filters.

MLW SERIES DERATING CURVES

Power Derating Curves*

*When designing these modules into an application, these power derating curves must be adhered to in order to provide reliable operation.

Part II – DC-to-DC Converters

NOTES: 1: Above 85°C Case Temperature. Derate Current and Voltage. Ratings as Follows:

- a) Input Voltage: Derate Linearly to 33 VDC at +125°C Case Temp.
- b) Input Ripple Current: Derate linearly to 270mA on MLWF-200, 400mA on MLWF-400 and 480mA on MLWF-600 at +125°C case temp.
- c) DC Input & Output Current: Derate linearly to 750mA on MLWF-200 and 1.7 Amp on MLWF-400, 600 at +125°C case temp.

2: Typical Applications. Result in Vout Within 2% of Vin.

3: Meets MIL-STD-1275A (AT) 3.1.3.1 Surge, and MIL-STD-704A Figs 8 and 9. For these standards derate output linearly from 40 W at 105°C to 20 W at 125°C.

4: Meets MIL-STD-461C 10.2 CS06 limits.

5: Meets Panavia SP-P-90001, British Standard BS3G100, and Civil Aircraft D0160 Standards.

6: Above 125°C case temperature derate as follows:

- a) Output Ripple Current: Derate linearly to zero at +135°C case temp.
- b) DC Input and Output Current: Derate linearly to zero at 135°C case temp.

NOTES:

- ^aMLWF-300 and MLWF-300F have 60dB rejection between 400kHz and 50MHz.

Lambda's MLWF Series of high density, high reliability DC input filters provide transient and reverse voltage protection, and EMI filtering for Lambda's MLW Series DC-to-DC converters. With input voltages centered around 28VDC, the MLW and MLWF Series are ideal for worldwide airborne applications. In addition, the MLWF Series provides key MIL-STD-704 (A-D) transient protection and filtering to simplify overall system design. Simply call your local Lambda sales engineer or our factory to discuss your application.

HOW TO SELECT AN INPUT EMI FILTER

Example: For An MLWS-805

1. DETERMINE INPUT AND OUTPUT PARAMETERS:

Efficiency = 76% Minimum
 Minimum Input Voltage = 17 VDC
 Output Voltage = 5 VDC
 Maximum Load Current = 3.0A

2. CALCULATE INPUT CURRENT

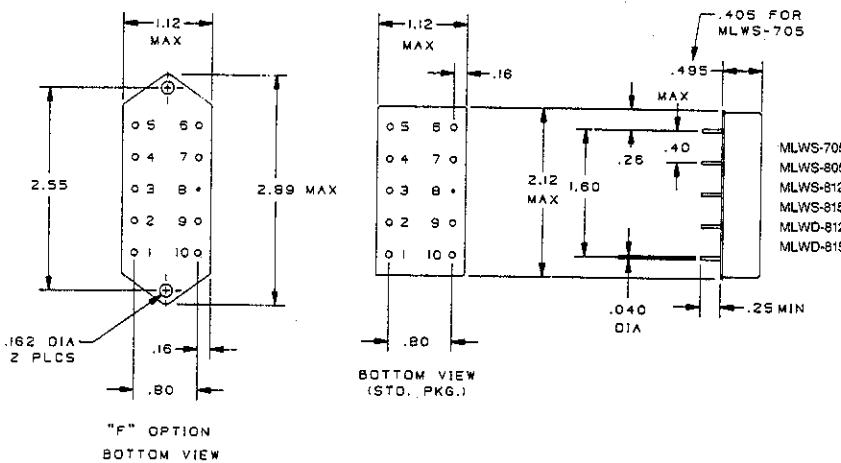

$$I_{INPUT} = \frac{P_{OUT}}{\text{Efficiency} \times V_{INPUT}} = \frac{15W}{(0.76) \times (17)} = 1.16A$$

3. Therefore, the MLWF-200 with an input current of 1.75 Amps is suitable for the application.

4. For multiple converter applications add up all input currents to determine which filter must be used.
